FEELING OF UNREST IS GAINING GROUND

Disquieting Reports Continue to Worry the Administration at Washington

WASHINGTON, Apr. 10,-State department dispatches indicate that Carranza officials are viewing with some anxiety the continued presence of roops in Mexico. One dispatch, it is understood, contained a hint that certain Mexican officials believed the purpose of the American expedition has been accomplished—that the Villistas had been dispersed. It was said that the government would not be surprised if Carranza will soon set a date upon which Carranzistas thought the Americans should be withdrawn,

SAN ANTONIO, Apr. 10.-General Funston has received from General Pershing a report "from a point below Namiquipa" that made no reference to the cavalry believed to be in the vicinity of Parral. Villa is said to be beyond Parral, two or three days ahead of the Americans,

WASHINGTON, Apr. 16.—Secretaries Lansing and Baker refused to comment on reports that the agreement between Washington and Carransa had fixed a "Dead Line" beyond which the Americans must not go in pursuing Villa. Secretary Baker said such an agreement would come under the pending protocol.

AND BEGIN AN ENERGETIG CAMPAIGN

SAFEBLOWERS GET AWAY WIT

treated in the same manner as the Shemanski strong box. However they found nothing of value and, after strewing the contents of the safe on the floor of the office moved across the street to the jewelry store where the big haul was made. Entrance to the big haul was made. Entrance to the market was effected by breaking find stores left open that the officer from the imitation and took the formal paid no further attention to the case mer.

For the first time in three years a job of safeblowing was pulled off early yesterday morning on Main street. A big haul was made by the yeggmen who must have been experts in their line as every indication proves they were masters of their art.

The chief victim was B. Shemanski, whose loss runs into the thousands as the robbers cleverly selected nothing but the best goods, consisting of mounted and unmounted diamonds, it is believed the value of the missing property will exceed \$7,000 but the actual amount cannot be determined until the owner completes checking up his stock.

Before forcing the safe as Shemanski's it is evident that the yeggs were surprised while at the yeggs

At Shemanski's it is evident that beyond reporting to Chief Evans, and the burglary was not discovered until yesterday morning at 10 o'clock.

According to custom Mr. Sheman-ski came down town to get his mall and dropped into his store on the north side of Main street. An ac-quaintance from Goldfield seeing him them entered to buy a ring. This led Shemanski to cross the street to his jewelry store and, as soon as he entered, the robbery was evident Back of the rear showcase the floor was strewn with empty trays taken was strewn with empty trays taken from the safe which stood ajar. The utmost confusion prevailed and a glance at the inside of the big steel safe showed that nothing but the very choicest gems and been taken. These consisted principally of diamonds, both mounted and cut stones. A few pieces of jewelry are missing and also a couple of Howard high grade watches with a number of chains and

The burglars were careful not to work above a certain height in the safe as they feared they would be observed from Main street over the top of the tall showcase in the rear so they did not touch three rows of shelves above a height of four feet, one of these contained a large sum of money rolled loosely in a paper and the others had valuable jewelry.

On the floor was found a hammer On the floor was found a hammer wrapped in well worn rawhide to deaden the impact on steel. From the handle a piece had been torn. This segment was found in the market across the street proving conclusively that the market had been entered first. At Shemanski's an attempt was made to break the combination which was twisted out of shape and failling in that effort a hole was drilled so as to reach the tumblers when the bolts were shot back and entrance effected. Two drills were left on the floor with a gunny sack and the hammer.

Pay Day Wreathes

Disbursements by the mining companies of Tonopah and vicinity for the past month came round today with that regularity which has made the name of Tonopah famous. The event was 1912. Close estimates of the pay-roll place the total around \$420.

AFFAIRS

By Associated Press.) LONDON, Apr. 10 .- Income tax pay-

ers, who are now sending their checks to the treasury, the tax being payable before April 6, have had to pay just thirty per cent more than last year, and next year will have another forty per cent added to the bill. This was provided for by the finance act of 1915. Some people the tax hits pretty hard but there is little grumbling and the collectors report that the tax has been paid even earlies than it was last year, when the large tax payers surprised the treasury by paying long before it was due.

An effort has also been made to increase the amount received from income tax by including smaller wage earners and providing that all income wherever derived shall be subject to Camp in Smiles taxation. Before the war those earning less than 160 pounds were exempt;

land have been affected by the decisnopah famous. The event was on that all income, whether brought emphasized by the fact that sil- is to this country or not, is subject to taxtaining 624 cents an ounce, the only taining 624 cents an ounce, the only taining 624 cents an ounce, the only taining 624 cents and ounce the other simply paid on his earnings ion that all income, whether brought naturalization payers a year or two or the income which he used in this roll place the total around \$420, one on about \$20,000 in excess of the month of March. The increase is due to the larger number of men employed on surface work on the Tonopah Extension and the improved conditions of prospective companies that are employing much greater numbers catching up with work and placing properties in shape for substantial improvement.

Merchants and customers were alike happy and nothing but the most optimistic sentiments were expressed on all sides.

or the income which he used in this country. Now he must make a return of his income from investments abroad. This has always applied to Englishmen, but under the new act Canadians like Americans, who often send their savings home for investment, are now on an equal footing with their British neighbors. The Americans of course alike happy and nothing but the most optimistic sentiments were expressed on all sides.

WASHINGTON, Apr. 10.-The federal trade commission presented to congress a preliminary report of its investigations of gasoline prices. The report carries a mass of statistics on production and prices, but drawn no conclusions as to the cause of the rise in prices.

The report says: "If prices were raised to higher levels in some sections than in others, allowances were made for quality, freight and marketing conditions, so it may be inferred that the element of artificial manipu-lating has entered into the advance."

Price ranges show the price charg-ed by independents averaged about cent higher than the Standard rices. Exports for 1915 were 46,000, 000 gallons more than in 1914. The Cushing field output decreased from 96,000,000 gallons in April to 36,000,000 in December.
